RESPONSE TO RESTRICTION REQUIREMENT

Sir:

In response to the restriction requirement set forth in the Office Action dated July 26, 2007, Applicant provisionally elects Claims 1 to 5, as drawn to Formula VI where A₁ is a single bond, A₂ is thiophene, A₃ is a single bond, and A₄ is thiophene. See, for example, compound VI-14 in Examples 3 and 5. The restriction requirement is, however, traversed.

Certificate of Transmission

Claims 1 to 5 of the present application recite Markush groupings for alternatives of chemical compounds. MPEP § 1850(III)(B) sets forth guidelines for determining unity of invention in this situation. According to MPEP § 1850(III)(B), the chemical compounds shall be regarded as being of a similar nature where (1) all alternatives have a common property or activity, and (2) a common structure is present, i.e., a significant structural element is shared by all of the alternatives.

Here, Applicant submits that the chemical compounds in the Markush groupings have a common property or activity. For example, as described at page 10, lines 15 to 18 of the application, these compounds exhibit high mobility, high on-off ratio, and high durability. Further, Applicant submits that a common structure is present in these compounds. For example, the compounds are π -conjugated and contain two or more thiophene rings.

In view of the foregoing, reconsideration and withdrawal of the restriction requirement are respectfully requested.

Applicant's undersigned attorney may be reached in our Costa Mesa, California office at (714) 540-8700. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

Damond E. Vadnais
Attorney for Applicant
